

NOVA

Instrument Catalogue

Welcome to Nova
Quality dental instruments

- Exceptional range of single and double-ended hand instruments, including explorers, carvers, scalers, instruments for composites, curettes, burnishers, measuring probes and pluggers
- Excellent quality and service at very competitive prices
- Meticulous attention to detail and stringent quality assurance – extensively tested and produced to ISO standards
- Precision engineered by trained British craftsmen
- Mix of modern manufacturing techniques and traditional hand finishing
- The highest quality stainless steels to ensure top performance and long life
- Eliminate the need to use cheaper, lesser quality alternatives
- Choice of hollow, round, octagonal and silicone handles
- Other instruments include extraction forceps, elevators, tweezers, scissors, needle holders, clamps, hemostats, syringes and spatulas
- Fully autoclavable
- Truly global brand – available within the UK and via an expanding dealer network in every continent

Nova offers an exceptionally broad range of restorative instruments with a wide choice of instrument patterns and handle types – all manufactured by highly skilled craftsmen.

Composite instruments

- Specially designed for easy application of composite restorative materials
- Highly resistant to sticking and scratching thanks to ultra-smooth Titanium Nitride tip coating

Silicone handles

- Reliable and comfortable grip
- Very well balanced and ergonomically designed for excellent levels of control
- Colour coded for easy identification

Excavators

Our Restorative Instruments are available in the following handle options:

Composite Instruments

Composite restorative materials are often notoriously difficult to place and their sticky nature means they frequently adhere to the instrument rather than the prepared tooth, especially if the instrument has become scratched. Nova, the specialist in dental instruments, has the solution – a new range of instruments specifically designed for use with composite materials.

The tips of Nova's composite instruments feature a special Titanium Nitride coating. This creates an ultra-smooth surface that is highly resistant to sticking and scratching, helping ensure composite materials can be quickly placed and carved.

Composite Instruments are available in the following handle options:

Hollow: 8mm Round - **H**

Octagonal: - **O**

Round: Solid Handle - **R**

Silicone with alloy insert (lightweight 'shaped' handle) - S

Extraction Forceps UK/European Patterns

Extraction Forceps UK / European Patterns

Nova Extraction Forceps are manufactured from surgical grade stainless steel with a hinged joint to ensure optimum distribution of forces along the instrument. They are available in most common America, English and European patterns. If the forceps that you require are not shown we will be pleased to provide you with a quotation upon request.

Nova dental instruments are manufactured using only the **highest quality stainless steels** to ensure **top performance** and **long life**. The result is a product of **outstanding quality, produced to ISO standards**.

BASIC SURGICAL KIT

Kit contains:

- Mirror Handle Standard Socket (NOVNPS285)
- Probe UNC 15 (NOVNPS273)
- Scalpel Handle No 3 (NOVNPS275)
- Surgical Curette Lucas 85, 2.5mm (NOVNPS226)
- Periosteal Elevator Buser (NOVNPS203)
- Periosteal Elevator Prichard (NOVNPS202)
- Periotome 2 Anterior (NOVNPS217)
- Suture Scissors Iris Curved TC, 11.5cm (NOVNPS261)
- Crile Wood Needle Holder TC Straight, 18cm (NOVNPS249)
- Minnesota Retractor (NOVNPS236)
- Tissue Plier Serrated 17.3cm Straight 1.3mm TC (NOVNPS286)
- Basic Kit Cassette Tray (NOVNPS287)

NOVBASKIT

Nova Basic Surgical Kit

ADVANCED SURGICAL KIT

Kit contains:

- Scalpel Handle No 3 (NOVNPS275)
- Periosteal Elevator Prichard (NOVNPS202)
- Periosteal Elevator I6 (NOVNPS288)
- Cartridge Syringe 2.2ml Imperial (NOVNPS289)
- Surgical Curette Lucas 86, 2.8mm (NOVNPS227)
- Holding Forceps For Screw Driver Barth, 17.3cm (NOVNPS290)
- Atraumatic Micro Forceps Cooley 17.3cm Angled, 0.8mm (NOVNPS291)
- Tissue Forceps 1 x 2 17.3cm Straight, 1.3mm (NOVNPS292)
- Bowdler Henry Rake Retractor (NOVNPS237)
- Vestibulum Retractor, 18cm (NOVNPS293)
- Retractor Labanca Malleable, 20mm (NOVNPS241)
- Metzenbaum Scissors Curved TC, 15cm (NOVNPS294)
- Kelly Scissors Curved, 16cm (NOVNPS295)
- Spencer Ligature Scissors Straight, 9cm (NOVNPS296)
- Bone Rongeurs Luer, 15cm (NOVNPS297)
- Tissue Grasping Forceps Allis, 15cm (NOVNPS257)
- Mead Mallet With Teflon Inserts, 17cm (NOVNPS298)
- Bone Compactor/Applicator (NOVNPS299)
- Crile Wood Needle Holder TC Straight, 18cm (NOVNPS249)
- Mixing Bowl For Bone Material (NOVNPS300)
- Bone Chisel 4mm Angled (NOVNPS301)
- Bone Chisel 8mm Angled (NOVNPS302)
- Bone Chisel 8mm Straight (NOVNPS303)
- Advanced Kit Cassette Tray (NOVNPS304)

Nova Advanced Surgical Kit

Care & Decontamination Guidelines

Washer/Disinfector Cleaning

1. Your washer/disinfector must be CE marked or validated.
2. Use only low foaming, non-ionising cleaning agents and detergent and always follow the instructions for use.
3. Open any joints or hinges to to enable full draining.
4. Ensure heavy instruments are placed at the bottom of the basket.
5. Place any concave surfaces face down.
6. Use purpose-designed attachments to flush inside reamers, lumens and cannulas.
7. High alkaline solutions (pH>10) may damage some materials (such as aluminium).
8. Use soft, high purity water for final rinsing.

Ultrasonic Cleaning

1. Do not overload/overcrowd cleaner with instruments.
2. Clean for no longer than 10 mins.
3. Colour-etched probes or black composite instruments should not be cleaned in an ultrasonic bath.

Manual Cleaning

(NOTE: this is NOT a disinfection process)

1. Manual cleaning is recommended if you do not have access to an automatic washer/disinfectant.
2. In a sink used only for instrument cleaning, clean surfaces with an autoclavable brush and a CE marked cleaning solution to remove all debris.
3. Always brush away from the body and avoid splashing.
4. Pay close attention to serrations, hinges, ratchets, lumens and cannulas.
5. Rinse the instrument with soft high purity water and carefully dry by hand or in a drying cabinet.

Thermal Disinfection

1. Alkaline corrosive detergents should never be used.
2. Use only a CE marked machine and carefully follow the manufacturer's instructions.

Cold Disinfection

1. Bleach (sodium hypochlorite) should not be used.
2. Follow all manufacturer's instructions and warnings for de-contaminates, disinfectants and cleaning agents.
3. Use only CE marked products.
4. High alkaline solutions (pH>10) may damage some materials (such as aluminium).

Sterilisation with dry heat

1. Do not use dry heat to sterilise silicone handled instruments, hollow handled elevators or plastic mirror handles.
2. Aim for an ideal temperature 160°C, but never exceed 180°C.
3. Always follow the manufacturer's guidelines.

Sterilisation in an autoclave

1. Instruments should be dry before sterilisation.
2. Always follow the manufacturer's guidelines and never exceed the stated load.
3. Autoclave at 134-137°C for a minimum of 3 minutes.

General

1. Always repeat the decontamination process if any debris is still visible.
2. Damaged and worn-out instruments should be replaced.
3. Store instruments in a clean, well ventilated and covered condition.
4. If you have any queries, please contact your supplier.
